Phone (business hours)	Phone (after hours)	Phone (mobile)
-------------------------------	----------------------------	-----------------------

License Conditions. The license is for the Race Timing System software only. You will also need to read and agree to the license conditions of your license for FileMaker Pro™. The licensee is permitted to make up to ten copies of the Race System Software if required for use on different computers in a single event, but only one event can be run at the one time with one license. An event can consist of multiple races and multiple categories as long as they are being run from files hosted by one computer at your central race location. The licensee is permitted to make one backup copy of the Race Timing System CDROM for their own use for data security purposes. Copying or duplication of this software for further sale or free distribution is not permitted. Multiple copies of the parent database, FileMaker Pro™, cannot be made by the licensee if this would violate your FileMaker Pro™ license. Additional licenses for FileMaker Pro™ version 5 or greater are required to be purchased by the licensee from either FileMaker™ (in Australia - 1800 028 316) or an authorised software retailer. Intellectual property contained in the Race System Software shall remain the property of Russell Baker (the author) at all times. The author accepts no responsibility or liability for incorrect results from this system or any consequent or subsequent loss or damages because the system is reliant on correct data entry by the user into the supporting files and correct entry of athlete identification numbers and pressing the enter key by the user at the time of the athlete crossing the finishing line or a transition point. Timing accuracy is dependent on the accuracy of your computer's internal clock. Automatically generated results will be expressed to an accuracy of one second. The Race Timing System allows you to insert various organisation, sponsor and club logos as graphics for on-screen and printed reports. The user is required to obtain the appropriate permissions before using any logos or graphics. 12 June 2003

I wish to purchase a single license for this Race Timing System and I agree to abide by the license conditions. If this purchase is for a Club or Company, I am authorised to sign on behalf of the Club or Company to purchase the license and to agree to abide by the license conditions.
